

Aviation Auditor Training

Fact Sheet

Increase your knowledge - our AAT is a unique auditing course with aviation focus. You will gain relevant and concise quality management knowledge and simultaneously complete the basic training to be an aviation auditor. Video training, case studies and debriefings have the effect of greater learning success.

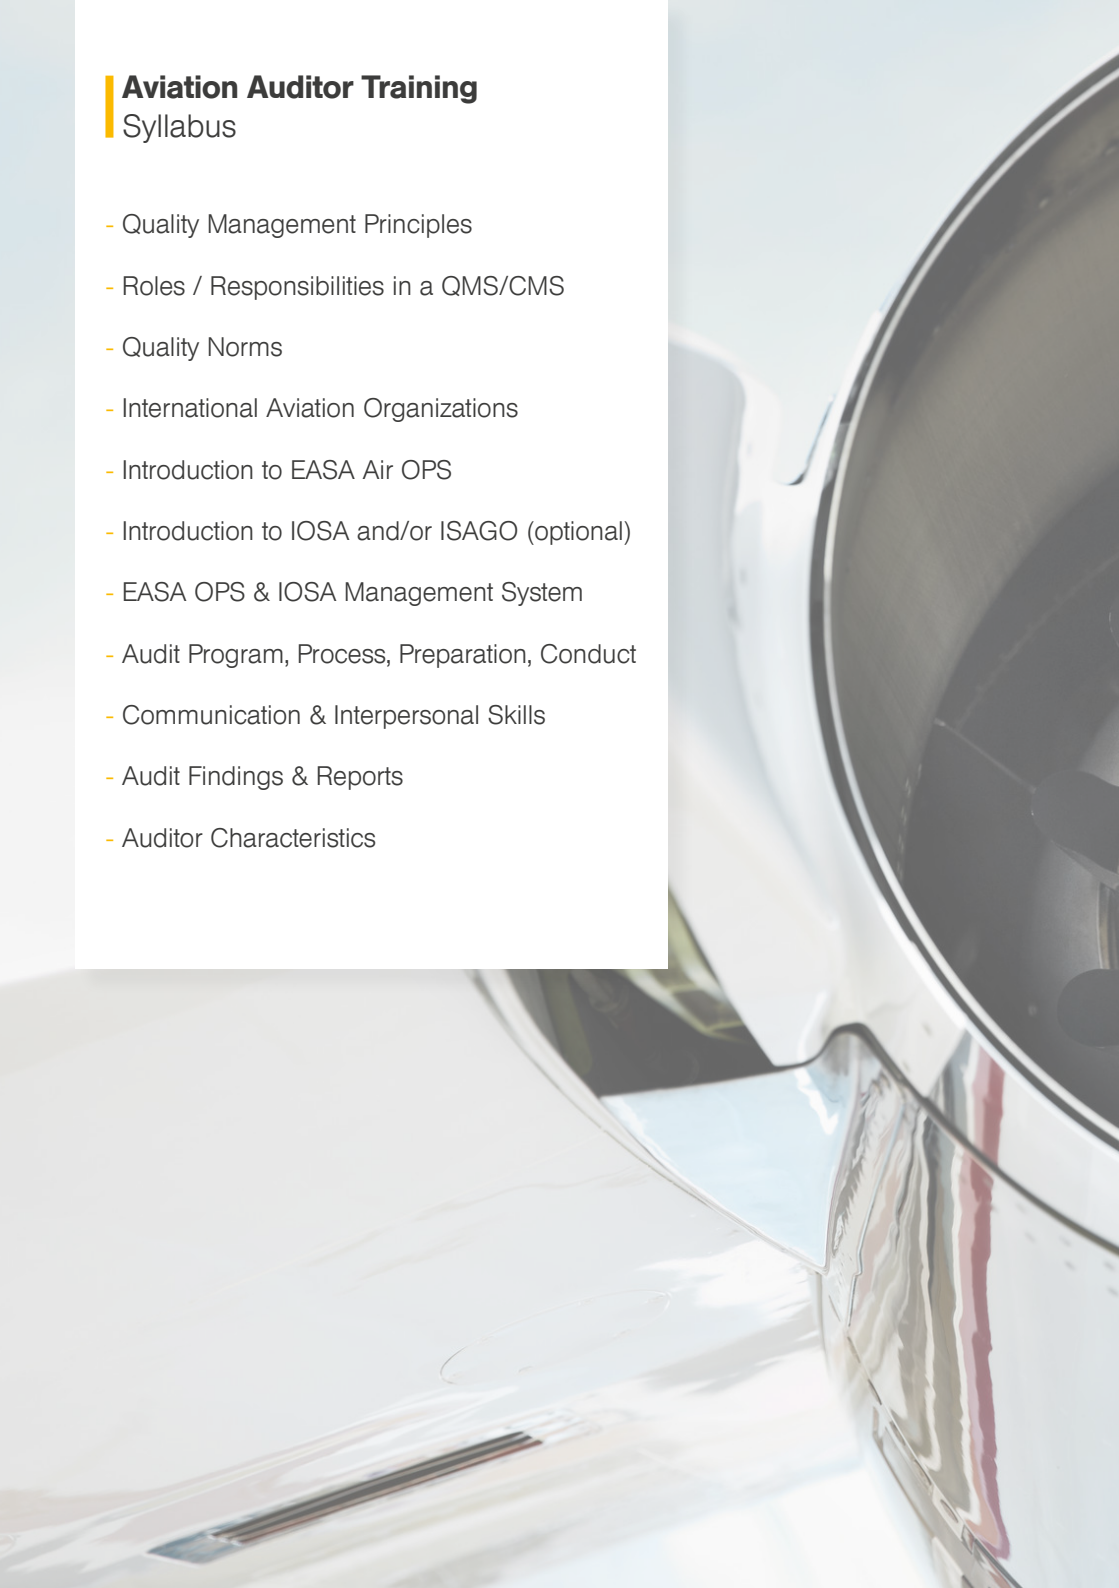

This training course is suitable for all airline-related companies. Course content and regulations are updated continuously.

Aviation Auditor Training

Syllabus

- Quality Management Principles
- Roles / Responsibilities in a QMS/CMS
- Quality Norms
- International Aviation Organizations
- Introduction to EASA Air OPS
- Introduction to IOSA and/or ISAGO (optional)
- EASA OPS & IOSA Management System
- Audit Program, Process, Preparation, Conduct
- Communication & Interpersonal Skills
- Audit Findings & Reports
- Auditor Characteristics

Why should people attend the course?

It is a foundation course in auditing, building confidence and honing skills and technique. Since the AAT meets the exacting ISO standards for auditing, it is a precursor for IATA Auditor Training. Simultaneously, it prepares participants for internal auditing within their organization.

What is the most valuable thing the participants will gain?

Students gain not only skills, knowledge and experience in auditing, but also a wealth of other tips and advice from our professional IATA and industry experienced trainers.

I would say the instructor has to bring so much to the course in order to make it interesting and worthwhile. This has helped AQS courses to be highly recognized by the industry at large.

- Peter Gunner, AAT Trainer
