

Safety Management System Training

Fact Sheet

The introduction of SMS will require additional resources in most organisations. To utilize these resources not only in an effective way but also in a way that benefits your organisation, it's imperative to fully understand the requirements stipulated and the tools available.

Our modular training courses deliver all you need to know to develop an effective SMS, leading to a significant reduction in cost and expenses. The courses are tailored for the different target groups within your organization in mind; from the CEO to the crew.

Very good training, great value for money, and serious credential. Instructors are very professional and knowledgeable, and it's very interesting to exchange with the other participants and learn from them.

Pierre-François Salmand
Individual customer

The SMS Complete course was highly interactive, with a lot of practical skills-learning exercises added to the interesting topics. The instructor was very professional. Through this training I have gained a deeper and more practically-oriented understanding of SMS.

Tihana Pejša
Croatian Civil Aviation Authority

📍 Frankfurt/Main, GER or worldwide, according to customer demand

🕒 2 days (SMS for S&Q)
3 days (SMS RAT)
5 days (both courses)

💬 Course language: English, other languages available upon request

Our **SMS/Risk Assessment Training** (RAT) links safety to risks and shows particularly how to perform different types of risk assessments individually and as a group. This course gives you the theoretical knowledge and skills necessary to conduct professional hazard analysis, risk assessment and risk mitigation recognized by ICAO standards and EASA regulations. Our experienced trainer team illustrates the topic with the help of interesting case studies and practical examples from the aviation industry.

Our **SMS for Safety and Quality Professionals Training** has been developed for everybody that has responsibilities for implementing and managing the Safety Management System (SMS). The main focus is on reducing costs and avoiding non-compliance when developing your SMS concept. During this 3-day training course you will learn how to convince your colleagues and management of the benefits of an SMS. You will understand the new roles and responsibilities used for a systematic risk management. You will also get to know the liability issues arising from SMS regulations and learn to avoid pitfalls.

The two training courses can be booked as a package for a special price.
