

Safety Culture Training

Fact Sheet

The training is a relevant component for all managers who want to understand and influence the importance of organisational dynamics and factors influencing safety. It gives you an overview of the importance of organizational climate and organizational culture. In addition to presenting various forms, this training will also address the role of leadership. Ways for determining the degree of cultural and climatic aspects in an organization will be presented and furthermore, possibilities for actively improving them will be developed in an interactive training format.
