

SMS Recurrent + SMS Advanced Training

Fact Sheet

Complexity increasingly characterizes and influences human activities. We need therefore to enhance the way we think about safety to face these challenges. The SMS Advanced Training course is built on the premise that an organization has already worked on the implementation of a Safety Management System (SMS) and provides the participants with the necessary approach to cope with complexity, think critically about safety and actively contribute to safer operations.

SMS Recurrent Training

Syllabus

- SMS Background
- What means measuring?
- Measuring Safety & reporting Culture
- Managing risks through leading & lagging safety indicators
- Defining a model for experts' judgement
- What's wrong with risk matrices?

Objectives

Refresh your knowledge of the elements of a Safety Management System (SMS) and get the possibility to familiarize yourself with tools to assess the effectiveness of an SMS.

A mix of lectures and practical exercises provides you with a comprehensive toolbox to contribute to the continuous improvement of your SMS.

Knowledge of Safety Management Systems and Risk Management Processes.

| Certification

After successful completion of the training the participants will be provided with a certificate.

Frankfurt/Main, GER or worldwide, according to customer demand

3 days

Course language: English, other languages available upon request

Our **SMS Recurrent Training** provides you with a chance to refresh yourself with the elements of the SMS and support your critical thinking to drive continuous improvement within your organization. Predicting the unpredictable is very difficult and every day it becomes more challenging to identify hazards due to factors ranging from the reduced ability to learn from experience to the introduction of new types of hazards and the increased complexity of our world. After some years it's therefore time to reflect upon the cultural changes introduced by a Safety Management System (SMS) and think about the identification of methods to measure its effectiveness and promote continuous improvement.

Complexity increasingly characterizes and influences human activities. We need therefore to enhance the way we think about safety to face these challenges. **The SMS Advanced Training** course is built on the premise that an organization has already worked on the implementation of a Safety Management System and provides the participants with the necessary approach to cope with complexity, think critically about safety and actively contribute to safer operations.
